

HydroSphere™

CLOUD DATA HOSTING SERVICE FOR TELEMETERED SOLUTIONS

New interface optimized for use on tablets and mobile devices!

Data Anytime, Anywhere

HydroSphere is a scalable, collaborative data visualization platform for outdoor water monitoring. Empower your organization and all data stakeholders by:

-  Telling your data's story with customizable graphs, tables and dashboards
-  Never missing an event with data-driven alarms and customizable escalation
-  Defining roles and access to your data with personalized credentials for each user
-  Building networks of monitoring sites
-  Creating public websites for visualization of curated data

My Dashboards

Make your data tell an instant story with dashboards tailored to the info you care about.

Secure Data Storage and Web Hosting

Rest assured with 24/7 monitoring, utilizing machine learning for data classification and protection.

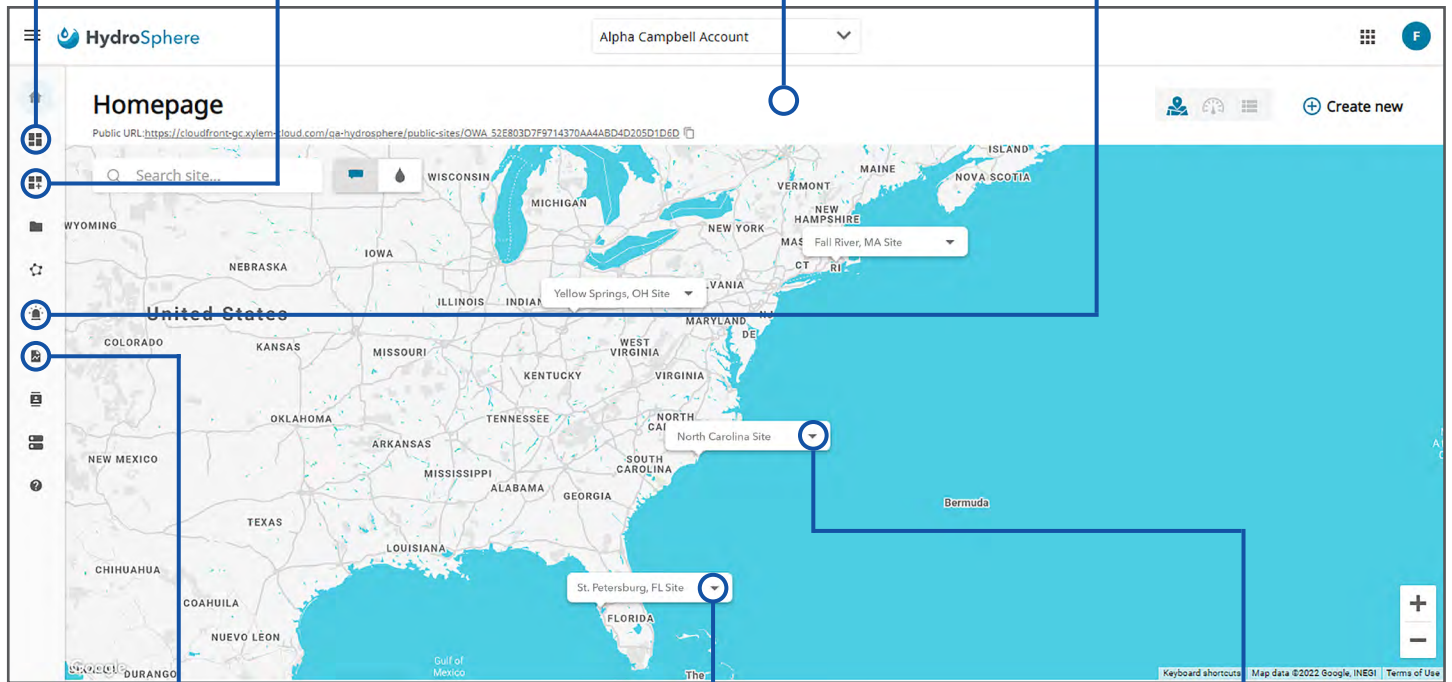

Dashboard Builder

Utilize customizable widgets to build unique data dashboards.

Alarms/Escalation Path

Create alarms so you never miss an event, and with alarm escalation paths, you can notify others if you're not available to react.

Export Customized Reports

HydroSphere allows you to create and manage custom reports that you can share with anyone; present your data how you want it to be seen.

Backfill Data When Transmission is Interrupted

Operating on a High Availability platform, HydroSphere will always be there with your data, with a 99.9+% availability rating.

View Anytime/Anywhere

HydroSphere's cloud-based design allows access to your data from any web-enabled device; log in anytime, anywhere.
